Q2.c→   One cannot not Communicate:

According to axioms formed by Paul Watzlawki, an Austrian philosopher. "One cannot not communicate", is the first axiom in his theory. According to him there is no way one cannot communicate. We are always communicating; even the silence sends out a message. Verbal or non-verbal, even the lack of action sends a message. Silence may be implicit message to others. One cannot not respond in a communication though this is communicating too.

Non-verbal actions send a message too. For example; one can not nod to confirm an action. This is has a message value too. Or cannot not respond to this communication, it's also a medium of communication. Thus, cannot be prohibited from occuring.
